PEONIES

When you plant Tree Peonies you are planting for effects of permanent beauty. Wellgrown specimens increase in size and loveliness with the years. No flower in our modern gardens has more rich historical associations and romantic traditions than has the Tree Peony. Use them in the background of your perennial garden, or find a place for them in the foreground of your shrub planting. Tree Peonies make attractive specimen plants. Our Tree Peonies are greatly cherished by gardeners because we offer the largest, strongest and sturdiest of plants.

A Tree Peony will make a delightful gift to some garden-loving friend.

OBERLIN PEONY GARDENS R. L. OBERLIN 425 PENN AVE., SINKING SPRING, Berks County, PENNA.

5 Miles West of Reading on Route 422

AN EXCELLENT EXAMPLE OF THE JAPANESE TYPE

AN EXAMPLE OF THE EUROPEAN TYPE

4-

1952 Peonies

In presenting the Peony, the Queen of Flowers, we wish to say to the reader, by way of introduction, that Sinking Spring, Pa., with its surrounding territory, is famous for its Peonies. The soil and climate are well adapted to the growth of this beautiful flower, which in delicacy of tint and fragrance surpasses all other flowers. If you are a lover of flowers, you are making a wise choice in selecting Peonies to grow, as they are the most satisfactory, being the easiest to raise of any and all flowers for this country, particularly the North. They are the most hardy, the most showy, the most dependable, the most reliable, the most wonderful flowers, and we might say the only flower you can't kill with neglect. The peony is a native of China and was a source of inspiration for painters and poets during the Golden era. Even today the conventionalized peony is much seen in Chinese art. Peonies are generally divided into two classes; (1) Herbaceous, the tops of which die down to the ground each fall and start new growth from the roots in spring and (2) Tree Peonies, which are woody and do not die down; but, start growth from the eyes which were formed on the branches the preceding summer.

In general, we may say that the herbaceous peony is very hardy, having been known to withstand cold as low as forty degrees below zero, Fahrenheit. This type of peony is perennial and under favorable conditions will bloom for a generation or more. The Herbaceous is comprised of the following types: Early May-flowering (species and hybrids), Chinensis, Japanese and Single.

Eight Weeks of Peony Blooms. We have these beautiful flowers with us for nearly two months. You may share our enjoyment with us for the same length of time by consulting this catalog and planting the varieties as they are classified, from the earliest to the very latest bloomers.

Time to Plant. The best time to plant both Tree and Herbaceous Peonies is in the autumn, beginning about September 1, although the early May-flowering section can be planted as early as August 15, and the planting of the roots can be continued until the ground freezes. To prevent heaving of the roots by frost, they should be covered with a mulch of leaves or straw manure the first season. Peonies can also be planted successfully in spring if this is done early, as soon as the frost is out and the soil is dry enough. If planted in the spring, water frequently during the summer.

Our Roots. Our roots have been tested on our grounds, and every one is true to name. If you wish to adorn your lawn or garden with true stock, correctly labeled, do not overlook this list. As to size, quality, and strength of our roots, they rank with the best on the market, and will usually bloom the first year. However we do not guarantee results, as we have no control over stock after leaving our hands. Do not be too hasty in judging the plants the first season, as all plants receive a shock when transplanted and should have a season's growth to become established.

Full Cultural Directions Included With Every Shipment.

TREE PEONIES (PAEONIA ARBOREA) for Your Garden

This species, a shrub in character, is one of the first to bloom in the early spring, followed immediately by the Herbaceous; early Mayflowering, Japanese, Single and Chinensis.

The tree peony is native to the mountains of China and from there was imported into Japan. Thence, in about 1800, it was brought to Europe where, after a good deal of hybridizing, the present European tree peony was evolved. The Japanese themselves continued to hybridize on the tree peony and about the turn of the century began to import these peonies into the United States. These were therefore known as Japanese tree peonies.

The shrub starts to produce an increasing number of sprouts from below, and in this natural way it continues to live and prolong its life, at the same time enlarging the clump. Therefore, in pruning, no living wood should be cut, but only the part of the shrub that has been winter-killed should be removed.

It will require a season's growth for it to become thoroughly established and show the perfection of its bloom. Double varieties will sometimes bloom single and semi-double until thoroughly established. The flowers are larger than those of the Herbaceous varieties, with a crepe-paper-like texture and ruffled and crimped on the edges of the petals. A well-established, mature bush is truly a gorgeous sight when in full bloom, growing 3 to 4 feet in height and spread and bearing 25 to 100 blooms.

No garden should be without several tree peonies. They make a very nice specimen plant and are a joy to behold. There are records that one plant had as many as 400 blooms on it. If properly located, cultivated and fertilized a tree peony will grow and bloom satisfactorily for many years.

Until the outbreak of the late World War we imported the better varieties of peonies from Europe and Asia and kept only the hardiest and best bloomers for listing in our catalog. At the present time we are entirely independent of any foreign source of supply due to the fact that we are continually engaged in propagating our plants, of which we now have the largest selection in America. We are able to offer plants originated by Professor A. P. Saunders, probably the greatest living tree peony hybridizer, and we also have available plants originated by Morgan D. Reinbold, Esq., a local hybridizer to whom we extend all the facilities and courtesies of our nurseries.

South and east exposures, in open spaces and in full sunlight at least half of the day, are the best locations. If planted where they are exposed to north or west winter winds, they should have protection by mulching with dry leaves or a screen the first year.

We thank you, our customers, for your past patronage and trust that you will try some of our newer varieties. In case you have any questions about the proper care and cultivation of peonies, be sure to write to us and we will be glad to supply the information.

TYPES OF TREE PEONIES

We Offer Three Different Types of Tree Peonies:

Japanese: This type produces large, broad-petaled flowers, the tips being crinkled with a crepe-paper-like texture and they have a central cushion of golden anthers which is typical of all Japanese Peonies. The foliage is cut finer and is narrower than European type.

European: This type produces large, double flowers similar to the double Herbaceous type. The foilage of these is broader than the Japanese type.

Yellow Lutea Hybrid: A new race of Tree Peonies has originated from the wild Tree Peony (P. lutea) crossed with other Moutan varieties. They all have characteristics of the parent Lutea, which is yellow. Their color is quite different from any of the other Tree Peonies, ranging from a pure yellow to a yellow and red combination which is most attractive. They are hardy but slow to propagate, hence very rare. Of the few varieties of these hybrids we have the following to offer under this classification at the present time. This group blooms about a week later than the Japanese and the European.

SIZES OF SHRUBS

The following prices are for strong 4 and 5-year-old shrubs that have already bloomed in our gardens. The size varies according to the variety, ranging in height from 12 to 24 inches, with several stems. We always send out the finest plants available in each particular variety. There is no comparison between these field-grown plants and the small pot-grown plants that are sometimes offered at a lower price. These pot-grown plants are usually 1 or 2 years old.

Tree Peonies are very scarce and in many instances the supply is not sufficient to meet the demand. At present we are unable to supply some varieties and have therefore omitted the price. Also we may run short on some other varieties during the season; so, we would suggest naming a second choice or granting us the privilege of substituting an equal or better value. If nothing is said, we will do so.

-If interested in varieties not marked please write for prices.-

Japanese Tree Peonies

		Each
1.	Aboukin. (Name of Old Palace). Large semi-double; clear crimson-red without a blue or magenta shade. Out- standing color. Best brilliant red Rare	
2.	Adzuma-Shibori. (Variegation of Adzuma). Large; double; fine scarlet with white splashes	20.00
3.	Akashi Jishi. (The Lion of Akashi). Enchanting clear pink, narrow waved petals protruding from the center	
4.	Akatsuki-no-Yuki. (Snow at Dawn). Large; single; light flesh, changing to snowy white when fully opened	15.00
5.	Anya-no-Hikari. (The light in the dark night). Brilliant blackish crimson; large double bloom	, 15.00
6.	Beikoku. (America). Large; semi-double; beautiful soft flesh-pink. Blooms very profusely on upright stems	15.00
7.	Chojyuraku. (Pleasure of longevity). Deep solid true pink, double bloom	
8.	Flora. Beautiful transparent white. Single to semi-double	20.00
9.	Fuji-no-Akebono. (Dawn at Mt. Fuji). Large; double; creamy white, with faint lilac-purple at base. Extra	20.00
10	fine Fuji-no-mori. (The Woods of Mt. Fuji) Large; semi-dou-	20.00
10.	ble; beautiful orchid. Good grower, quickly attaining a height of 3 feet	15.00
11.	Fuyoren. (Name of song). Single; very rare color, lilac- purple, deeper at the tips of petals	
12.	Gessekai. (Lunar world). Pure white, crinkled-petals. 12 to 15 inches in diameter. Strong grower, rare and beautiful. Best white	
13.	Gumpow. (Flock of phoenix). Deep rosy carmine; fringed petals. Very fine type. Semi-double; very profuse	
14.	Gunpoden. (Palace of grouping beauties). Large refined flowers of a very deep wisteria blue, very rare color	40.00
15.	Hakubauriso. (White Dragon). Large; semi-double; fra- grant; pure white, with central cushion of golden an-	
16	thers. Rare and beautiful	20.00
10.	crimson at base, semi-double	20.00
17.	Hanakisoi. (Contest of flowers). Deep cherry pink; waved petals; enormous size bloom. Exceptionally tall growth. Free bloomer; double	40.00
18.	Hana-no-nishiki. (Flower King). Large, double, cactus- formed blooms of Dark flesh, deeper at base	15.00
19.	Haru-no-Akebono. (Dawn of Spring). Large; double;	
	white with crimson shade; irregular form with split petals	15.00

- 20. Hiryo-Nishiki. (Flying Dragon). Large single vermillion flower with gold striped leaves
- 21. Imachowkow. (Name of Ancient Saint). Sulphur white, with golden glow, round petals, flat shape. Lovely golden anthers. Well shaped rare flower.....
- 22. Iwato Kagura. (Sacred dance of Iwato). Crimson with white splashes changing to deep crimson; double......
- 23. **Kamada-Fuji.** (Wisteria Blue) Large, beautiful, refined, very double flowers of Wisteria blue. The color is so distinctly different that it is noticeable from anywhere in the gardens. A very profuse bloomer. We consider it one of our very best varieties. Very rare.
- 25. Kasumi Gaseki. (Name of Place). Clear pink; ball shaped with fringed tips at petals. Large bloom.....
- 26. **Kathryn.** (Lambert, 1944) Single, greenish white with a golden center, good foliage, blooms profusely on erect upright stems.
- 27. **Kimigayo.** (Reign of Emperor). White, with faint flesh tints; large; double; stout upright stems.....
- Kokkoshi. (King of black light). Brilliant reddish black, margined with faint white stripes; large, double flowers. One of best rare varieties: Darkest red.
- 29. Kokuhow. (Black Phoenix). Large; double; luminous, clear blackish red; well-arranged petals.....
- 30. **Konronkoku.** (The land of Konron). Pansy violet, shaded reddish black; enormous size, double flowers.....
- 31 **Kumona-Nishiki:** (Variegation of Hues of Clouds). Medium; semi-double; luminous blackish crimson with white stamens. Pinkish yellow variegated foliage......

- 34. Mitama. (Beautiful Gem). Sparkling scarlet carmine; double and rare
- 35. **Miyako-no-Haru.** (The spring of Metropolis). Clear pink with crimson variegations. Large double flower.....

Yellow Lutea Hybrid

125	Alice Harding. (Lemoine, 1935). This striking novelty
	carries large full fragrant flowers of the purest yellow,
	exactly the color of Rose Souv. de Claudius Pernet.
	It was greatly admired by everyone that saw it, and
	especially by the well known plant lover after whom
	it was named. It produces the purest yellow bloom of
	any yet introduced
	- (a) 1000 m flamma and fairly lange

- 126. **Argosy.** (Saunders, 1928). The flowers are fairly large, semi-double, clear bright sulphur-yellow, deep purplered at the base, and stand upright on stout stems. Very vigorous grower with handsome foliage. Fragrant.....
- 128. **Chromatella.** (Lemoine, 1930). This is a sport from the beautiful variety Souv de Maxime Cornu, it is similar in form and habit; but, the blooms are pure sulphur yellow, without any shade of salmon or buff. Large; double and very fragrant. We consider this variety the best double yellow at present.

131.	. L'Esperance. (Lemoine, 1909). Large blooms 8 inches wide, with 8 to 10 broad, round fringed and wavy petals, clear primrose-yellow with buff shade, blotched carmine at their base. It is very hardy and blooms profusely, on erect stems. Beautiful outstanding va- riety. Fragrant	
132.	Mme. Louis Henry. (L. Henry, 1919). These cup-shaped flowers are about 6 inches in breadth and are formed of 6 or more waved petals. The color is a mixture of carmine, buff and pink, shaded salmon and coppery yellow, with purple markings at the base of the petals. Fragrant	20.00
133.	Roman Gold. (Saunders, 1941). A very brilliant yellow of perfect form. Single. One of the best.	15.00
134.	Satin Rouge. (Lemoine, 1926). Large full double flowers, averaging 8 inches in breadth, with broad petals of a satin appearance, and of a bright blood red, passing to an old red shade after some days. A distinctive different color in Tree Peonies; very fragrant	20.00
135.	Souvenir de Maxime Cornu. (L. Henry, 1919). Very large (8 inches in diameter) and extremely double blooms; most fragrant of all peonies, Color, deep yellow heav- ily shaded orange-salmon. Distinct. A very vigorous variety becoming very tall and bushy. Profuse	15.00
100	bloomer	15.00
136	Surprise. (Lemoine, 1920). Very large bloom with irregu- lar petals of a mixture of straw-yellow, pale salmon, and rosy purple. It is tall and vigorous, and the very double, fragrant blooms are carried on strong stems	15.00
	MIXED	
	Unnamed. Fine strain of Japanese and European types. Must be sold as mixed and cannot be guaranteed as to color or type	7.00

HERBACEOUS PEONIES

Our plants usually have 5 or more well developed eyes with sufficient vigorous roots to insure the most rapid growth and development, which invariably produce blooms the first year. In no case are they smaller than the standard 3 to 5 eye divisions.

Early May-Flowering Peonies SPECIES AND HYBRIDS

1.	Tenuifolia flpl. Double, crimson-red flowers. Fernlike	Each
	foliage	3.00
2.	Corallina. Single, brilliant crimson flower. Rather fine-cut foliage	2.00
3.	Officinalis rubra plena. Large, brilliant deep crimson flower—the old-fashioned "Piney" of our grandmothers. Extensively used on Memorial Day. Double	1.00
4.	Officinalis alba mutabilis. Light pink, changing to white. Double	2.00
5.	Officinalis rosea plena. Earliest, rich rose. Double	2.00
6.	Officinalis alba plena. Large, convex, double, pure white bloom. A very scarce and valuable variety	3.00

8.	Le Printemps. Creamy yellow. Single	3.00
9.	Mai fleuri. Cream with carmine glow and orange-yellow stamens. Single	3.00
10.	Messagere Sulphur-white. Single	4.00

Chinenis Section (Double)

In order to assist the purchaser, in making his selection easy, we have carefully classified Peonies as to color and season of bloom in a systematic manner in the following list.

The ratings of the American Peony Society are given, following the name of the introducer and time of introduction. The highest rating a Peony can attain is 10; this is considered perfection.

White Peonies

EARLY

11.	Festiva Maxima. (Miellez, 1851). 9.3. The very largest milk- white bloom, flecked crimson. Magnificent	1.00
12.	Mme. de Verneville. (Crousse, 1885). 7.9. Large, very full, bomb-type flower, with pure white center, blush when first open; fragrant. Medium height.	1.00
13.	Duchese de Nemours. (Calot, 1856). 8.1. Wonderful buds; cup-shaped, sulphur-white bloom	1.00
	MIDSEASON	
14.	Mme. Crousse. (Calot, 1886). 7.9. Medium size, pure white, center flècked crimson; most fragrant. Strong stiff stem. Best all-around white	1.00
15.	Mons. Dupont. (Calot, 1872). 8.3. Flat, milk-white blooms,

JAPANESE PEONIES

This is a type of Herbaceous Peony developed from the single type. In the process of development, the stamens and anthers have lost their character as such, and have become transformed into narrow, thick petaloids or into narrow petals tipped with vestiges of the yellow anthers without pollen, and are surrounded by five or more broad guard petals.

They are strong growers, and many fine varieties, embracing a wide range of color, have been imported to this country from Japan; some seedlings of exceptional merit have also been produced by American growers. Grow under the same conditions as the so-called Chinensis Peonies and require the same treatment.

	Oberlin Peony Gardens, Sinking Spring, Pa.	21
127.	Ama-no-sode. (Japan). 9.2. One of the best "Japs." Bright rose-pink. Staminoids yellow, edged gold and	Each

Orders	amounting	to	\$50	10	per	cent	off	
Orders	amounting	to	\$100. and upward	15	per	cent	off	

To entitle you to these discounts cash must accompany the order.

TREE PEONIES

BANKSI

A WHITE JAPANESE TREE PEONY

The Tree Peony is an aristocratic plant that will give distinction and charm to any garden. It is a dramatic improvement on the familiar old "Piney" and deserves a worthy setting. You will never regret planting Tree Peonies—just as many of them as you have room for.

The varieties illustrated here in color produce flowers averaging 5 to 8 inches in diameter.
